

## FIT GUIDE - AEROBAR PAD OFFSET & HEIGHT

### How to:

- Correctly measure aerobar pad stack and reach for input into GURU Bike Discovery software
- All measurements are referencing the center of the bar bore
- All measurements are in millimeter and must be entered into the software accordingly

Name of the aerobar on existing setup  
you are using for reference measurement

Name:

Extension length:  mm *The length of the extension in a horizontal plane.*

Pad Offset:  mm *Measure how far behind the base bar the back of the pad is.*

Pad Height:  mm
